

Maintenance & Modification

All you need to extend the lifetime of your offshore living quarters

Products & Services

Surveys & studies

By examining and analysing your infrastructure, we identify compliancy and return of Investment (ROI) for your projects. Our experience enables us to suggest the optimal solutions for maintenance or upgrading.

Life extensions & hygienic upgrades

By evaluating occupational hygiene, we secure and improve your employee's stay on board.

Architectural & area upgrades

We can upgrade entire areas of your living quarters – including galleys, coffee shops, cabin areas, offices and more.

System upgrades

HVAC, firefighting, electrical instrumentation and telecom (EIT), piping or other critical systems; our expertise brings them all up to date.

Engineering

We have EPC competence from simple modules to complex living quarters modifications.

Maintenance & service

Leirvik is your accommodation maintenance partner, with unique living quarters insight and service-minded operators.

Digitalisation

Team up with Leirvik to digitalise your living quarters. Let us help you generate value through use of IoT, data analysis, machine learning and LQ know-how!

Aluminium products

Low weight, high strength and superior corrosion resistance makes aluminium the ideal maintenance free material for offshore conditions. Our Raised Access Floor and Handrail system are widely used.

Trust the expert

Leirvik is the leading EPC supplier of aluminium offshore living quarters and related services. We guarantee quality products and services all the way from initial engineering for new living quarters to life-extending upgrades executed offshore.

Leirvik is your partner for all maintenance, refurbishment and upgrades – with a track record of more than 400 domestic and international projects. Surveys, early studies/FEED and EPC engineering are vital parts of our maintenance and modifications offering, and we provide in-house engineering for all disciplines in a living quarters project – regardless of size: Architectural, electrical, instrumentation, telecom, HVAC, HSE/technical safety and structural.

Our experienced offshore operators will travel wherever and whenever to solve your needs.
